WT-G-RLED6510K
65" 10Pts UHD Touch LED Monitor

This 65-inch touch monitor is integrated with Infrared touch technology supporting 10 simultaneous touch points, to provide smooth response from the touch display. The device is plug and play with Windows 7 and later OS and with multi-touch applications. The Touch display helps to enhance making presentations with software supporting annotation, white boarding and many other touch applications. The display also supports UHD resolution to provide with crisp 4K images and content. The built in Android player makes the menu selection and working with the display easy and user friendly. The touch display also supports audio playback thru the built-in speakers. The touch displays also have toughed glass on the touch surface to make the touch movement smooth and protects the LCD behind.
